

MASTER OF SCIENCE IN GLOBAL SUPPLY CHAIN MANAGEMENT

The online Master of Science in Global Supply Chain Management program equips the next generation of supply chain leaders to create real business value and offer transformative solutions. Built on the expertise of our faculty and Purdue's strong ties to the manufacturing industry, our curriculum integrates comprehensive, core global supply chain management principles with a strong focus on manufacturing, technology, and analytics.

The program is designed not only to enhance your expertise in supply chain concepts but to allow you to take your next giant leap while balancing work and life. Our fully online format fosters connections between students and faculty while maintaining crucial flexibility.

Through experiential learning opportunities, students also gain practical experience while learning to adapt to the business technology that defines the future. This program equips students to apply classroom learning to real-world challenges, preparing them to innovate and lead in a variety of roles.
