Purdue's Daniels School of Business offers a PhD in Economics which develops core competencies in microeconomics, macroeconomics and econometrics, while allowing students to choose specialized study in a variety of different fields. The Economics PhD is well-suited for those interested in rigorous application of mathematical tools to better understand decisions made by individuals and firms, and to evaluate economic policies.

By collaborating with renowned faculty in the areas of econometrics, experimental and behavioral economics, industrial organization, international trade, labor economics, macroeconomics, and public economics, our doctoral students go on to conduct frontier research at leading universities, shape public policy and influence business strategy.

Grounded in a strong methodological and quantitative orientation, our PhD program broadens students' understanding of economic issues, provides an opportunity for individualized research and specialization, and sharpens critical thinking skills.

**FACULTY RESEARCH AREAS**

- Computational economics
